Notes:

1. All Values are ppm Total PCBs.
2. All sample locations are approximate.
3. A value of 0.0168 ppm is assigned to sample locations where soft sediment samples could not be retrieved after 2 attempts.
4. All pipeline, underwater structures, archeological features and intake locations provided by J.F. Brennan.
5. Secondary composite location is shown as the centroid of the secondary sample locations within a DMU and may fall outside of the DMU boundary.
6. PCB values below the limit of detection (LOD) are reported at one-half the LOD.
